SERIES: 10399

3

TITLE: Audit selection system

DATES: 1989-

ARRANGEMENT: numerical by system type

ANNUAL ACCUMULATION: 3.00 cubic feet.

DESCRIPTION:

These files contain records used for selecting taxpayers for audits. They contain specific tax return information, including copies of returns, and tax payments made by individual taxpayers. The files may also include confidential federal income tax information from the Internal Revenue Service, informant lead information, and other taxpayer records used as evidence supporting the selection of taxpayers for audits. The files may include a description of the audit selection criteria and evaluation ratings and the name of the auditor assigned to the account.

RETENTION:

Retain for 3 years

DISPOSITION:

Destroy.

RETENTION AND DISPOSITION AUTHORIZATION:

Retention and disposition for this series were specifically approved by the State Records Committee.

APPROVED: 11/1998

FORMAT MANAGEMENT:

The retention and disposition information on this schedule applies to the record copy which can be in any format. The record copy can include different formats. Format management information provided here is for the purpose of managing records that are being either stored by or transferred to Utah State Archives.

Paper: Retain in Office for 3 years or until administrative need ends and then destroy.

Computer data files: Retain in Office for 3 years or until administrative need ends and then delete.

3

TITLE: Audit time and accounting system

DATES: 1990-

ARRANGEMENT: Chronological, thereunder numerical by account number

ANNUAL ACCUMULATION: 2.00 cubic feet.

DESCRIPTION:

These files encompass a complete system of paper input documents, computer programs and database files, and computer generated reports. The system keeps track of all assigned audits, auditors' time, completed audit information, and information about audit appeals. Paper documents used for entering data may include "buck slips", forms containing information about a completed audit, such as additional assessed tax, penalty and interest, and forms containing other audit related information such as opening conference dates, taxpayer contact names, and errors found in the audit. The system keeps track of appeal information, and the status of each audit that is appealed. Generally, this information consists of receipt dates of legal documents, and dates of hearings or court cases.

3

TITLE: Delinquent tax collection system

DATES: 1987-

ARRANGEMENT: Numerical by account number

ANNUAL ACCUMULATION:

DESCRIPTION:

This computer data system is used by the Tax Commission Collection Division, to identify those taxpayers who owe the state unpaid warrants, taxes or assessments.

UCA 59-1-706(2) (1990), gives the Tax Commission the authority to establish collection procedures. The system provides a list of taxpayers which have unpaid accounts. It then compares this list to those taxpayers receiving refunds and automatically deducts any unpaid amounts from the taxpayers refund. The information held in the system includes notes of authorization for collection and notes on actions taken. Also includes taxpayers name and address; account number and social security number; liability or tax due; tax period and reason of tax.

After comparison is made and refund deducted, this information is then transferred to the taxpayers account, which is series 7729, individual income tax system. This system is up-dated annually.

RETENTION AND DISPOSITION AUTHORIZATION:

These records are in Archives' permanent custody.

APPROVED: 12/1991

FORMAT MANAGEMENT:
